## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - A. Claims 1-13, 38-46 and 51, drawn to method and system for providing an incentive, classified in class 705, subclass 14.
  - B. Claims 14-37 and 47-50, drawn to token and token capture device, classified in class 370, subclass 270.
2. Inventions A and B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination B has separate utility such as an ordinary telecommunications receiver and an ordinary signal being received. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, search, or patentability requirements, restriction for examination purposes as indicated is proper.
4. An attempt was made on 17 May 2006 to request an oral election to the above restriction requirement, but did not result in an election being made. Donald L. Wenskay, Esq., the contact person given in the last communication from applicant (filed on 22 December 2004), is no longer with the law firm of record. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
